

NA20 Wireless Dongle

The NA20 Dongle is a compact wireless transceiver that enables plug-and-play audio and video transmission between PCs and Nearity host devices. With 2.4GHz WiFi connectivity, a Sync function for easy pairing, and an intuitive RGB indicator, it provides a cable-free, portable solution for enhancing your meeting experience.

Product features

WiFi Wireless Transmission

Enables wireless audio and video transmission between PC and compatible Nearity host devices via 2.4GHz WiFi, reducing cable clutter and offering flexible setup.

USB Plug & Play

Connects directly via USB-A for seamless integration with computers, ensuring easy installation and broad compatibility with Nearity platforms.

Sync Function

Supports pairing, pairing reset, and device firmware update via Sync mode for simple operation.

Visual Status Indicator

Equipped with an RGB LED that provides clear visual feedback through flashing or solid-light modes for pairing, activity, and system status.

- Plug&Play
- Ultra-lightweight & Compact Form
- Sync Pairing & Update
- RGB Status Indicator
- Easy to Install and Relocate

Nearity NA20 Datasheet

Contents	Technical Specifications
System	USB-powered
	Interface: USB-A (USB 2.0, 480Mbps)
	2.4GHz WiFi
	RGB LED Indicator (Flashing / Steady On) <ul style="list-style-type: none"> - Streaming: White steady on - Updating: Cyan flashing - WiFi Pairing: Green flashing (unconnected) / Green steady on (pairing complete)
	Supports Sync for pairing and updating
Physical Characteristics	Product Dimensions: 80*20*50mm (Antenna vertical height)
	Package Dimensions: 91*60*22mm
	Net Weight: 18g
	Gross Weight: 35.5g
Others	Power Supply: USB 5V-0.5A
	Color: Starry Gray
	Packing List: NA20 Quick Start Guide *1, NA20 *1, C-A Adapter *1
	Usage: Connect to PC to transmit audio and video via WiFi to an NA20-compatible host device
	Type: WiFi Audio/Video Dongle
