The Nuroum V34AF is a 4K conference webcam with a 4-element MEMS microphone array. Auto focus available, the camera is capable of capturing vivid details with printing quality. The 4K camera and the HDR feature make participants always look clear. Auto Framing and a 5x digital zoom can perfectly focus the presenter in the field of V34AF. Equipped with the noise-cancelation and echo-free microphone array, the V34AF brings the collaborators an immersive experience. Simply connect it to your computer with a USB cable and it's ready to use, no extra drivers required and it can be supported by remote control.

Product features

Auto-focus

Fast auto focus webcam provides crystal image quality, easy to capture every detail.

Auto-Framing

The AI-powered V34AF has an auto-framing feature and a large 90° field of view. V34AF can automatically detect the presenter in the field and center him/her in the picture.

4K image

The V34AF features a 4K@30fps/1080P@60fps UHD camera. It presents peerless images and vivid colors.

AI Noise Suppression

Dual microphones with AI noise suppression filter out unwanted noise and automatically pick up your voice within a 5-meter radius, making your voice more natural and clear.

HDR

HDR technology automatically adjusts to help you present your professional look in any lighting environment, including direct sunlight or high-contrast lighting conditions.

5x Digital Zoom

You can zoom in by using the remote control to focus on yourself. Enjoy a clear video experience, even zoom in 5 times.
